O.C.R

President of the Friends, Inc. 9/93 A.D.

Trustee of SCCC 10/89 To 5/94

Private Chiro'prac'tic Practice in San Bernardino, CA

Associate of Rol & Eileen Lucas, Drs. C. (PSC 1941), San Bernardino

Associate of Una Carey, D.C. (PSC 1908) San Brdo, CA and STL employee 1962-63

Associate of J.W. Parker, D.C., Ph.C. (PSC 1947) in Fort Worth, Texas. Re: Parker Chiro Resource Foundation

Associate of J.Wm Tegerdine, D.C. (PSC 1921), who was the first NCM teacher at Palmer, in Palo Alto, California

Associate of Stephan A. Duff, D.C., Sr. in San Rafael, Calif. where I worked with his PSC 1947 friends Frank Maurice, George Banks and Wentland.

Thompson-Ramo-Woolridge (TRW) at Edwards, A.F.B. missile Static Site; as a "Master Sgt." or liaison, for testing rockets, especially Minute Man Missiles.

Private Chiro'practic Practice in Lancaster, California; But, worked my First year days at Northrop Aircraft; as a Tech Writer, for John Northrop and my office nights.

Post-graduate work at Hollywood College of Chiropractic (absorbed by LACC) in Los Angeles, California, for just 120 hours of Physio; i.e. Electrical, Therapy; and, an associate of Walter Gingerich (PSC 1921), Homer York (Ratledge CC), Sheik Mal-Elia (PSC 1947), John King (PSC 1947), and Keith Brandau (PSC 1947); I worked for and with the best Drs. C to learn their methods/etc.

Apt'rent'ice of Colonel B.J. Palmer, D.C., Ph.C., who was raised, razed and caned, when needed, after he was born on 10 September, 1882 A.D., to be first a Magnetic Healer and then a chiro'practor by his father, D.D. Palmer, the Father of Chiro'practic and all leg'it'imate Kiro'practors after 10 September 1895.

Apt'rent'ice of my grandfather Giovanni or John Chiaugur'l'os >Cirullo(s) who was born in Lucca; as in Luke; i.e. St. Luke, Siccula, Sicilly in May 1875 A.D.; And, then raised as an Apprentice, Fellow-craft, Journeyman & Master Bone-Setter before he moved to Pueblo, Colorado in 1906 where my father, Bernard L., and mother, Mary, taught me how to read and write, esp. "The Golden Rule," at 3 years old.

Apt'rent'ice of my grandfather Josef or Joe Zsajacz or Saits, who was born in Buda-Pest, Hun'gary on 16 July 1879 A.D. and then raised and razed; i.e. trained and caned if needed, to be a machinist, time study, weights and measures man; as were his fathers and grandfathers; i.e. pa'rents, before him from the East. He moved to Pueblo, Colorado in 1906 to help the owners of the Colorado Fuel & Iron Corp. build their pueblo plant from 1906 until he retired; as head of Weights & Measures Dept!

I was born on 15 July, 1931 A.D. played 7 years; as a child should, then began learning our family trade(s) and avocation of history, languages and public relations.

RE: Our ICA-C's Board meeting on 3 June 1995 A.C. and its agenda.

Dear Brother John:

This is my letter of congratulations to those who won our last ICA-C election and my condolences to those who did not at this time.

As has been my habit since The Year of our Lord 1954, I will be at our next ICA-C's Board meeting in Palm Springs. Will be there with rings on my fingers, but no bells on my toes. I would not want to miss the racket you all will be making at The Racquet Club this coming Saturday. Good Habits, like bad ones, are hard to break.

As usual, I will begin this letter by quoting my favorite authors and authorities on not only life in General; but, also, the practice and teaching of The Art, Science AND, NOT OR, Philosophy of Chiro-prac-tic Per Se. Per Se is: Examinations and Adjustment, when needed, of Sub-lux-ations. Although my authors aren't with us physically, they are with us mentally and spiritually on this Memorial Day. I will assure you, [not insure you as do Insurance Company Adjusters who are often Manipulators and not Adjustors], of that.

My first two quotes are from Volume 18, 'THE SUBLUXATION SPECIFIC * THE ADJUSTMENT SPECIFIC,' and Volume 37, 'THE GLORY OF GOING ON,' which our Elder Brother-in-Chiropractic, B.J., copyrighted in The Years of our Lord 1934 and 1960 before he spiritually traveled on.

> "We may be excellent students, but almost never scholars; learned, but not wise; broadly informed, but not experienced for time produces understanding, and understanding is the essence of wisdom." That's at the page 68 in Vol. 18; John.
>
> At the bottom of page 81 of Volume 38, 'THE GLORY OF GOING ON,' in Chapter 8, 'CATCHING MENTAL FISH,' is the following:
>
> "We want you to know WE LOVE YOU BECAUSE YOU LOVE ALL THE THINGS WE LOVE. To us, you are like a great big bubbling-over enthusiastic family, in mischief one minute, and saving the world the next by adjusting vertebral subluxations the next.
>
> For we never know how far-reaching something we may think, say or do today will affect the lives of millions tomorrow.
> GET THE BIG IDEA, ALL ELSE FOLLOWS."

My third quote comes from D.D. Palmer. I think it is apropos at this time; because this one is in his old Text Book, 'THE CHIROPRACTOR'S ADJUSTER.' The Father of Chiropractic and all legitimate, [as opposed to illegitimate], Chiropractors quoted The Law on p. 625. Words below r in a Chap. with no number above one word,

"COPYRIGHT

The above is a copy of the title page of a book, compiled, published and copyrighted by the last named person. On the title page is a copy of a portion of the title page of its re-issue. [SN BLC: B.J. COPYRIGHTED 1ST; DD WAS MAD AT HIM.]

The party to whom I am indebted for a copy of my mutilated articles says: 'Vol. 1 is a dandy compilation of gall and usurpation of another's labors and ideas.'

Portland has one of the best law libraries in America; from a volume on copyright I copied the following:

'A work in order to be copyrighted must be original, in the sense that the author has created it by his own skill, labor and judgment, without directly copying or evasively imitating the work of an auther [sic author].

It must contain something meritorious from the author's own mind, which would not have found existence in the form presented but for the distinctive individuality of the mind from which it sprang.

To constitute a person an author within the meaning of the copyright laws, he must by his own intellectual labor and skill produce a work new and original in itself.

An employer is not an author. A person who hires another to write a book and gives him the description and scope of the work is not the creator of the work for which protection is claimed. [SN: BJ WAS WORKING FOR D.D.; AS A GOOD SON SHOULD!]

Penalties for inserting or impressing false notice. The false insertion or impression of a notice of copyright in or upon any article, whether such article be subject to copyright or otherwise, or knowingly to issue, sell, or import any article bearing such false notice of copyright, is prohibited under a penalty of one hundred dollars#1, recoverable one-half for the person who shall sue for such penalty and one-half to the use of the United States. The circuit court of the United States sitting in equity are authorized to enjoin the issuing, publishing or selling of any article marked or imported in violation of the copyright laws. [#1? PENALTY IS MORE NOW!]

So, too, an author may maintain an action at law for the injury to his reputation as an author arising from false repre-

sentations as to his authorship of a work or from the publication of his work in mutilated form.' [SN: LAW, DD KNEW.]

About one-half of the 432 pages of the reissue were originated by me, created by my own skill, labor and judgment. The Articles (40 of them) are meritorious; they would not have found existence in the form presented, but for the distinctive individuality of my own mind from which they sprang."

The mind from which 'they sprang,' John, was our wandering, good, OLD DAD CHIRO's Innate Intelligence and then his Educated mind, which unfortunately for D.D., waited until 1910 to (c) his work.

[A>- As an Adjustor should, our Legal, Collateral, Academic and Practical or Clinical Father, [D.D. Palmer, The Chiropractor's Adjuster], was just reminding not only his Legal Genetic, Academic and Practical or Clinical son, [Col. B.J. Palmer, D.C., Ph.C.], but, also, his other Chiro-prac-tic sons and daughters to be very careful in the future.

[B>- Very careful whenever they thought about copyrighting that which they thought they, [as under-graduate and post-graduate Chiro-prac-tic Students], had discovered and/or invented after they became attached to his Art, Science and Philosophy of Chiro-prac-tic Per Se.

[C-O>- Although you, i and anyone else, John, can copyright something IF what we wrote and/or spoke about is more than one-half our own original thoughts, words and deeds; we still must give credit to The Creator or Originator of The Word and words which we are using, misusing and/or abusing. One must do that in order to be an Ethical, Moral and Legal author and authority on any and all words. Words which another person has already coined, spoken, written and copyrighted first.

[C-1>- And if anyone cannot or will not do that for one reason or another, that person is what The Law calls a Violator. The ones I have been calling the Manipulators and Alligators.

[C-2>- Manipulators, my Brother-in-Chiro-prac-tic, are easy to find because they will tell you and everyone else that they are in fact Manipulators and not Adjustors. Manipulators, as you know, innately want or need to manipulate, [i.e. 'TO MOLD SLOWLY,' according to Webster's Dictionary], people, places & things; esp. 'JUST WORDS.'

[C-3>- An Alligator on the other hand, John, is almost, but not quite, like an Adjustor or Adjuster, as our Chiro-prac-tic Father, D.D. Palmer, verbally called himself. And to be sure no one every forgot that fact, he wrote, 'THE CHIROPRACTOR'S ADJUSTER,' at the top of not only all 1,009 [one thousand and nine] pages of, 'THE SCIENCE, ART AND PHILOSOPHY OF CHIROPRAC-

TIC,' but, also, on The Spine of his Text Book which he copyrighted. Copyrighted in The Year of our Lord 1910 when our Chiro-prac-tic Father was, for a short time, in Portland, Ore. For one year, John, D.D. had his 3d and last P.S.C. there!

[C-4>- Whereas The Manipulators have a problem with their thyroid gland; The Alligators have a serious dis-ease; i.e. a lack of ease. The Manipulators are very hyperactive; esp. when they are trying to manipulate their own patients, friends, relatives and associates. Alligators always appear to be underactive until they are in litigation. Then quicker than you, John, can blink your eyes or cross the 'T' in Chiro-prac-tic; Alligators, like chameleons, change their color and song; esp. when they are confronted by an Adjustor who knows not only the definitions of words; and, also, how to really translate them.

[C-5>- Words and where they came from, my younger Brother-in-Chiro-prac-tic, are nice to know; esp. when one is involved; as an Adjustor should be, in D.D. & Col. B.J. Palmer, D.C., Ph.C's:

W.O.C.; i.e., The World Of Chiro-prac-tic;
W.H.O., i.e. With Hands Only; and,
C.B.C., i.e. not only Central Broad-Casting Co.;
but, also, Chiro-prac-tors Broad-cast Chiropractic.
All those letters are, as you know John, just: Call signs for BJ's Radio-TV stations and his slogans.

[C-6>- As one of Col. B.J. Palmer's younger Brothers-in-Chiro-prac-tic and a third generation descendant of not only The Palmer School [aka College aka University] of Chiro-prac-tic; but, also, a third generation descendant of D.D. Palmer, The Father of Chiro-prac-tic and all legitimate, [as opposed to illegitimate], Chiro-prac-tors; I want you, John et al, to know that:

The Manipulators and Alligators [who claim to be Chiro-practors, Doctors and Philosophers of Chiro-prac-tic] are just a minor pain in the neck. They can be adjusted sooner or later.

[C-7>- They are a minor, not major, pains in the neck of not only Chiro-prac-tic, [as the legal living body, nerve system and mind it is], at this time in The World's History; but, also,

[D-1>- my younger Brother-in-Chiro-prac-tic, The Manipulators and Alligators have been pains in the neck for all us who have innately been Adjustors since The Year of our Lord 1897. That's when our Chiro-prac-tic Father, The Master Magnetic Healer, Opened or Founded the first of his three [just 3] Palmer Schools of Chiro-prac-tic in Davenport, Iowa.

[D-2>- The heart of the matter, John, has been that those who have been Manipulators and Alligators did not know or did not care "that making passes," as D.D., The Magnetic Healer, would say

if he could do it now, "at patients with their cheiros, [i.e. 'HANDS,' in Latin, John], is not all there is to Palmer's Chiro-prac-tic Science, Art and Philosophy Per Se."

[D-3>- Per Se, in the case of Chiro-prac-tic, is Costra Nostra; i.e. Our Thing. The Thing which D.D. and Col. B.J. Palmer, D.C., Ph. C. tried to teach everyone was and is Our Thing and no one else's. Our Thing by way of D.D's Prior Art's Right to just one disorder and method of operation, i.e. vertebral subluxation[s] and adjustment[s]; and B.J's Copyrights. Copyrighted B.J. did Vol. I;, then to be sure B.J. copied it right; D.D. copyrighted two [just 2] books. Per Se, John, is in their many articles, pamphlets, news-papers, journals and books; esp. their copyrighted Text Books.

Text Books they used when they were, my younger Brother-in-Chiro-prac-tic, not only The Sole-owners and Presidents of The P.S.C. between 1897 and 27 May 1961 Anno Domini when B.J. took that long, long, long vacation we must all take; but, also,
Presidents of their Associations and those who were associated with them while they were physically, mentally and spiritually with us during their 63 years of many joys, pleasures, tribulations and trials. As B.J. always said, "It's in the books."

[D-4>- So when anyone, John, tries to tell you that they are a descendant of The Palmers; esp. our wandering, good, OLD DAD CHIRO, D.D., The Chiropractor's Adjuster; just ask them to not only put their money where their mouth is; but, also, ask them to show you the chapter & verse in 'THE S.A.P. OF CHIROPRACTIC: THE CHIROPRACTOR'S ADJUSTER,' wherein any D.C. is supposed to be a Manipulator and not an Adjustor. Like a rose is a rose, is a rose; John, a D.C. is a D.C., a D.C. is a D.C.

[D-5>- Better yet, my younger Brother-in-Chiro-prac-tic, show them the attached copies of articles I copied right. Then step back a few feet. Because Manipulators and Alligators, [esp. if they are Palmer Alumni], are predisposed to having weak stomachs. Stomachs, intestines and rectums which contract and propel whatever is in those big oblong & round muscles out at a very high velocity before they can relax and contract again.

[D-6>- Alligators and Manipulators, you see, really do not like to be confronted with facts and figures which are the truth, The Whole Truth, & NOTHING BUT THE TRUTH; esp. in court's of Law.

[D-7>- And the truth, The Whole Truth, AND NOTHING BUT THE TRUTH, so help me God or Chiro, [i.e. The Holy Trinity in Latin or Italian, John], here in California the definition and scope of practice for Chiropractic and all chiropractors is:

[.1>- NOT Insurance Codes and numbers, I can assure you!

[.2>- Our definition and scope of practice is NOT our California Business and Professional Rule #302. Rule 302 is just supposed to clarify and NOT SUPERSEDE Section #7 in our 1922 A.D. Calif. Chiro. Initiative Act.

[.3>- More important than Rule #7 is that simple definition and scope of practice for the words, 'CHIRO-PRAC-TIC,' & 'CHIRO-PRAC-TOR,' which are in our 1972 Federal Medi-Care Act, i.e.,

> 'Medi-Care will pay chiropractors for just the manipulation [sic adjustment], as proven by recent x-rays [sic films].' Then there is, John,

[.4>- Article 2 in Palmer's Good Book, Gospel or Bible; i.e., 'VOL. 14, THE CHIROPRACTIC TEXT BOOK.' All Art. 2 is, is the definition and scope of practice which all Palmer Graduates must know verbatim and give to others. Esp. give to Legislators, Governors and Presidents of Insurance Companies and their Executives when they ask they ask this very two [2] part question:

> "WHAT IS AND IS NOT CHIROPRACTIC; and, what can [technically] and may [legally] a person do with their title of chiropractor and D.C. degree?"

[D-8>- Well, my younger Brother-in-Chiro-practic, any Palmer Graduate who cannot or will not respond to that simple question with the answer below this paragraph must have dyslexia. Or, that D.C. is trying to avoid The Truth or Consequences of his or her actions. Actions when they are in The Battle Field of Life where the action is; or, just teaching others in a Chiro-prac-tic College and weak-[sic week]-end Post-Graduate School of Chiro-prac-tic. How many, John, can still say:

> "Chiropractic is a science, art and philosophy of things natural; a system of adjusting the segments of the spinal column by hand only, for the correction of the cause of dis-ease, [i.e. lack of ease]." That is just the first part of Art. 2

[.1>- I know we, John, as dues paying members of the ICA and/or ICA-C, should use our present ICA's and ICA-C's definition and scope of practice which Bill Day and his Board of Directors used for D.D's coined and Col. B.J. Palmer's copyrighted words; i.e. the root word, 'CHIRO,' affix, 'PRAC,' and suffixes 'TIC' and 'TOR.'

[.2>- However, I also know that our now deceased Brother-in-Chiropractic, [Bill Day, D.C.], and his Board of Control and Directors thought that the definition and scope of practice they wrote back in circa 1970 A.C. was a good

one. Bill, as our ICA President, thought they were:

[a>- Going to bring about Unity, without conformity of course, with those who controlled the ACA and its State Ass'ns; esp. CCA's and LACC's Presidents.

[b-o>- Naturally, John, that Unity attempt failed.

[b-1>- Whereas Bill Day's attempt at unity failed, Article 2 at least not only kept almost all Palmer Alumni united; but, also, almost all of the graduates from Colleges opened by our Palmer Brothers and Sisters. Esp. those who joined The ICA and its State Associations. ICA-C, you see John, also used Art. 2.

[c-o>- As many others have, Bill Day, you see, forgot:

[c-1>- B.J. was/is The Copyrighter/Developer of D.D's words and letters or abbreviations; such as those 3 little words we all love; i.e. Doctor Of Chiropractic, and just two little letters; i.e., D.C.

[.3>- Bill Day, you see, and his other Board Members 'almost' learned everything Col. B.J. had to teach them. Teach them not only about his own experiences; but, also, the experiences of others with whom he had been associated after he was born in 1881. Ones like Father, The Chiropractor's Adjuster, and 30,000 + of his own graduates.

[.4>- As one who not only learned about Bill et al's Big Idea, from which all else followed; but, also from Col. B.J.; all I can say and write at this time is the same thing he and out Elder Brother-in-Chiro-prac-tic, [Ralph W. Stephanson, D.C., Ph.C.], wrote in the 'INTRODUCTION' to Volume 14. This is the last part of Art. 2. I.e.,

"The first definition is Dr. Palmer's and is the best. It tells exactly what Chiropractic is, without limiting its scope without saying things which are not true, as the others are inclined to do. The second one is from the U.C.A. Model Bill, which is very limiting and therefore not exactly true. The third definition is from Dorland's Dictionary. After the student has mastered this book, if not before, he will see that definition is too limited."

[.5>- As not only Chairman of our ICA-C's Ethics Committee, immediate past Chairman of our Chiropractic Information Bureau, past Parliamentarian and a Wordsmith; I think we, [as members of our ICA-C], should either fish for Chiropractors in California who know Article 2 is still a very good definition and scope of practice; or, cut bait and go back to work. Always is, John, another school to fish.

[.6>- More apropos, let's go hunting for Manipulators and Alligators who are using misleading, false and/or fraudulent advertising here in California. Use, we can, just our Calif. Bus. and Pro. Code Rule #311, 'ADVERTISING.'

[.7>- Do, my younger Brother-in-Chiro-prac-tic, just a little adjusting of those who have not only had simple Subluxations and complex Vertebral Sub-luxation Dysfun-ctions; but, also, Palmer's Sub-LUX-ation Syndrome. That is a serious disorder of LESS [sub] LIGHT OR KNOWLEDGE [lux] than anyone, including me, ought to have at any given moment in time and space; esp. here in California.

[a>- Here in California, John, were we, as licensed Doctors OF Chiropractic, are supposed to be doing precisely what Section #7 in our Calif. Chiro. Init. Act demands that we do. I.e.,

[b>- 'Practice chiropractic as taught in chiropractic schools and colleges,'

and,

[c>- not practice, [as do the Manipulators and Alligators], like M.D's, Surgeons, Osteopaths, Homeopaths, Naturopaths and Otherpaths in The Healing Arts, Sciences, Philosophies and Religions. In Religion, I am a Roaming Catholic.

[D-9>- Far be it from me, my younger Brother-in-Chiroprac-tic, to stop anyone from learning as much as that person can learn from others. But, when it comes down to 'the practice OF Chiro-prac-tic;' all a Palmer Graduate MAY do, 'PER SECTION #7,' is use; but not misuse or abuse, Col. B.J's and R.W. Stephanson's Article 2. That was/is the intent of Sect. #7.

[D-10>- All their Art. 2 does is allow us; as Palmer Graduates or Palmer Method Chiropractors who have taken their post-graduate training at Palmer or from a Palmer Graduate is to do the following:

"Use a system of adjusting the segments of the spinal column by hand only,' or if you like you can use an Adjusting Machine or Thompson Drop Table with that clause. As long as our intent is to adjust the cause of dis-ease, i.e. lack of ease, caused by a sub-lux-ation we are not only legal; but, also, moral and ethical.

Because, John, if you are in the right tent, you know that first clause in Col. B.J. Palmer, D.C., Ph.C's Art. 2 means:

Chiropractic is a Science, so we can be Scientists;
Chiropractic is an Art, so we can be Artists; AND,
Chiropractic is a Philosophy, so we can be Philosophers!

Wasn't that nice, John, of our Elder Brother-in-Chiro-practic, [Col. B.J. Palmer, D.C., Ph.C.], to open up all of Art, Science and Philosophy for us with his definition and scope of practice for the word, 'CHIROPRACTIC,' which he copyrighted in 1906 A.C. and kept right on copyriting.

[D-11>- You see, my younger Brother-in-Chiro-prac-tic, although it is true that Philosophy is, 'The love of wisdom.' It is also true that the translation of 'PHILOSOPHY' back to its original meaning in Persia, Greece, Sicily, Rome and France was and is:

'The Brother, [i.e. Filio in Latin or Italian], hood of Sophia.' And Sophi, John, lived in Persia long before B.C. I.e., Before Christ was born in The Year of our Lord 'O' at Bethlehem, IS; not Ben CiRullo, Ph.C.

[D-12>- All we have to do, my Brother, is remember that when our cheiros, [i.e. 'HANDS,' in Latin], are on a patient; we must adjust, which by definition is 'TO FIX FAST,' and not manipulate, [i.e. MOLD SLOWLY], the segments of the spinal column and/or other parts of any vertebrata, esp. all homo sap'iens.

[L-1>- And the 'segments' of the spinal column are not just the bones or vertebrae of the spinal column. The Segments are, [from above down and inside out of course], the brain stem, nerve systems, [i.e. central and autonomic or automatic one], blood vessels, muscles, ligaments, tendons, discs et al. That, John, is what Col. B.J. Palmer meant by, 'THE SEGMENTS!'

[L-2>- Manipulators and Alligators, you see, just thought and think, unfortunately, that all of the multisyllabled words they have used to write their own definitions and scopes of practice were better than the one used by B.J. in Art. 2.

[L-3>- That's why, John, they have never been able to propagate their own species since the first Manipulators and Alligators migrated into Palmer's World Of Chiro-prac-tic where those like us Adjustors, With Hands Only, were and are able to perform The Wonders Of Chiro-prac-tic with ease and not dis-ease.

[L-4>- That's also why, my younger Brother-in-Chiro-prac-tic, they have desperately needed not only our Brothers and Sisters from Palmer; but, also, our Nieces and Nephews from the Colleges Opened, Inherited, Bought or Adopted by our Palmer Sisters and Brothers-in-Chiro-prac-tic; such as Carl Cleveland I & Sid W.

[L-5>- Without using misleading, false and/or Fraudulent Advertising to lead some of our Brothers, Sisters, Nephews and Nieces into The Territory of MD's, Osteopaths, Naturopaths and Otherpaths; The Manipulators and Alligators would never be able to:

[a>- Walk into Government and Insurance Buildings;

[b>- Talk to Legislators, Governors, Presidents, Vice Presidents and other Executives in those buildings;
and,
[c>- Sell them their misleading, false and fraudulent Services, Products and Ideas. Ideas; such as, they are the authority to consult when it came and comes to who is the authority on The Subject of The Art, Philosophy AND Science of Chiro-prac-tic and Topics of Chiro-prac-tors.

[L-S>- I know there has been many who have graduated from our Alma Mater, High Mother or Academic and Practical or Clinical Foster Mom, The P.S.C., who have joined The Manipulators' and Alligators' Ass'ns which has now become The ACA and CCA here in California since The Year of our Lord 1897 and esp. shortly before and after 1921 A.C.

[S-I>- Back in 1921 A.C., [my younger Brother-in-Chiro-rac-tic], is when the Real Chiro-prac-tors adjusted subluxations. And, as a result earned and received our Calif. Chiro. Init. Act.

Then the Cheiro-prac-tors, [who claimed to be Chiro-practors], slipped into our Act to use, as they still do, their their cheiros; i.e. hands, to not only manipulate and mold slowly all the parts of their own patients' bodies, minds and spirits; but, also, use electrical equipment to stimulate or depress the flow blood just like Osteopaths and Otherpaths do.

Did that after the graduated with only 9 or 18 menses or months of under-graduate training and discipline in the wombs of their own Alma Maters before their High Mothers died and were absorbed by L.A.C.C., whose owners were not Palmer Graduates. Cales were alumni of Osteopathic and Naturopathic Schools here in California. [RE: CALES AND HISTORY!]

Then those who D.D. Palmer called, 'The Mixers,' Col. BJ Palmer nick-named, 'The Chiro-prac-toids,' and I have Trade Marked, 'THE MANIPULATORS,' and 'Alligators,' proceeded to create what Col. B.J. Palmer called, 'THE GREAT DIVIDE,' in Chiroprac-tic's living body, nerve systems and mind. It, like Humpty-Dumpty, has never been Adjusted by an Adjustor and cured by God, Who as you, John, know is our Palmer U.I.

Some thought and still think that 'GREAT DIVIDE' was caused by that new piece of thermography equipment; i.e., The Neurocalo-meter. However, John, that divide was caused by first 'JUST WORDS' and then the actions of The Mixers, Chiropractoids, or Manipulators and Alligators. Ones who just wanted to be Doctors of Something; but, didn't care about or want D.D. and Col. B.J. Palmer, D.C., Ph.C's real Chiro-prac-tic ideas or thoughts, words, equipment and deeds.

[GLENO-HUMERAL JOINTS>- Whereas, the cheiro-prac-tors walked out

of their Schools and Colleges of Chiro-prac-tic and into their own buildings. Ones which are always Trade Marked, 'CHIRO-PRACTIC OFFICES,' not something else to do their own things; and,
Whereas, they have been practicing and teaching their very own patients, relatives, friends and associates what they had learned from the Sole-owners and Presidents of their own Academic and Practical or Clinical Foster Parents;

let us, as Adjustors, resolve that old, chronic dis-ease or lack of ease, by adjusting, [i.e. 'FIXING FAST,' by Webster's definition], that old Chiro-prac-tic disorder A.S.A.P.

[ANKLE AND FEET JOINTS>- Walk away, John, from our next Board meeting ready & willing to do battle with any & all Manipulators.

And that, my Brother-in-Chiro-prac-tic, is precisely what I intend to do. However, I am going hunting for Alligators and not the small fishes, i.e. The Manipulators, who are swimming around in Calif.

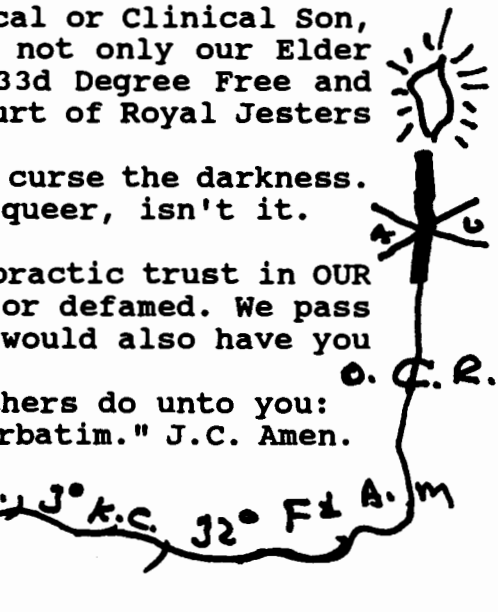
[I>- Swimming around without knowing exactly what The Law, [i.e. The Words in our California Chiropractic Act, Bus. and Pro. Codes], is. Is for those who have graduated from Schools whose Trustees, Presidents and Faculties should have taught them, as under-graduate and post-graduate students, what Chiropractic is, is not; and, what they can and may do.

[II>- The Manipulators and esp. The Alligators who are their own Leaders, my Brother-in-Chiro-prac-tic, are not following:

[A>- Our wandering, good, OLD DAD CHIRO, [D.D. Palmer], The Chiropractor's Adjuster who wrote at the bottom of page 644 in his Text Book, 'THE Science, Art and Philosophy of Chiropractic:

"An author, lawyer or chiropractor, ought to be familiar with and comprehend the meaning of the words which he freely uses; or, at least, not be backward in the use of a dictionary."

[B>- D.D's Legal, Genetic, Academic and Practical or Clinical Son, Col. B.J. Palmer, D.C., Ph.C. who was/is not only our Elder Brother-in-Chiro-prac-tic; but, also, a 33d Degree Free and Accepted Master Mason in our Shriner's Court of Royal Jesters who wrote:
[.1>- "It is better to light one candle than to curse the darkness.
[.2>- Anything I do, you do not do, is queer; queer, isn't it.
And,
[.3>- Our illustrious father placed this Chiropractic trust in OUR keeping, to keep it pure and not sullied or defamed. We pass it on to you unstained, to protect as he would also have you do."
[C>- "You do unto others; as you would have others do unto you: this is The Law and The Prophets know it verbatim." J.C. Amen.



Sincerely,

FULLO, JR., D.C., Ph.C., J°K.C. 32° F&A.M.

BJ's Vol 27 "History Repeats" — 1951

CHAPTER 1

The Story Of CHIROPRACTIC HISTORY

By D. D. Palmer

(THE CHIROPRACTOR, a Monthly Journal, Vol. 1, No. 1, December, 1904 *(47 years ago)*. Published by The Palmer School of Chiropractic.)

In 1886 I began healing as a business. Although I practiced under the name of magnetic, I did not slap or rub, as others. I questioned many M.D.'s as to the cause of disease. I desired to know why such a person had asthma, rheumatism, or other afflictions. I wished to know what difference there was in two persons that caused one to have certain symptoms called disease, which his neighbor living under same conditions did not have. Physicians answered me by saying that they would give such-and-such remedies. I did not want to know what they would give; I desired to learn what difference there was in the man of health, and the one who was diseased. I wanted to learn the cause of disease; why one was afflicted and the other was not.

In my practice of the first ten years under which I named magnetic, I treated nerves, followed and relieved them of inflammation. I made many good cures, as many are doing today under a similar method. My constant thoughts were that there was a difference in the person affected and the one not so. I was fully aware that I was treating effects. What was the cause of those ailments was what I desired to learn. I had progressed far enough to learn in what region was the cause of any described symptoms.

There must be a turning point. It was so with Chiropractic. But it took years to discover and develop that which I named Chiropractic, which means hand fixing. A Chiropractor is one who adjusts or repairs with his hands.

Ninety-five per cent of all deranged nerves are made by subluxations of vertebrae which pinch nerves in some one of the fifty-one joint articulations of the spinal column. Therefore, to relieve the pressure upon THESE nerves means to restore normal action — hence normal functions, perfect health.

The laws upon which this science is founded are as old as the vertebrata of the animal kingdom, but have been overlooked because of inherent superstition misdirecting the unlightened mind of investigators.

The cause of disease has been, and is yet, mysterious to the great mass of humanity. Chiropractic has solved the mystery. The old idea, that the cause of disease is outside of man, still prevails in most of the schools of healing, and the cure consists in finding something outside, which, by being introduced into the body of the sufferer, will drive the disease out. Therapeutic methods give remedies to treat the effects. The Chiropractic idea is that the cause of disease is in the person afflicted, and the cure consists in correcting the wrong that is producing it.

Chiropractic finds the cause in pinched nerves of the person ailing, and releases that pressure by adjusting some of the 52 articulations of the vertebral column. In doing this there is no rubbing, slapping, knife, drugs, artificial heat, electricity, magnetism, hypnotism, stretching, or mental treatment, in fact nothing but the adjustment of the displaced vertebra. This is not done with any surgical appliances nor any apparatus whatever, but simply by the use of the hands. The adjustment is almost instantaneous. The movements are unique and Chiropractic in every respect; no other system has anything similar. Chiropractic is the only system that exactly locates the cause of disease and cures by hand adjusting.

A large share of diseases are caused by nerves being impinged in the foramina, which are occluded by the displacement of the vertebra. These vertebra are replaced by the hands, using the processes as handles.

(THE CHIROPRACTOR, a Monthly Journal, Vol. 1, No. 1, December, 1904 *(47 years ago)*. Published by The Palmer School of Chiropractic.)

PLEASE NOTE OUR WANDERING, GOOD, OLD DAD Chiro, THE CHIRO-PRACTOR'S ADJUSTER, KNEW A "LARGE SHARE," NOT ALL, DISEASES, ARE CAUSED by VERTEBRAL SUB-LUX-ATIONS

THIS IS, JOHN, A COMPOSITE,

INTRODUCTION

Art. 1. REMARKS.

This book is written for use in the class room. It may, however, be studied just as easily by the field practitioner, and is not too technical in most of its parts to be readily grasped by the layman. It has grown, rather than having been written; it is the expansion of the notes which were tested in the class room for six years, and the writer believes that, with the constant arrangement and betterment to suit the requirements of the students of Chiropractic, this has created a real textbook, rendering easily understood a subject that students have always said was difficult.

Art. 2. CHIROPRACTIC DEFINED.

"Chiropractic is a philosophy, science and art of things natural; a system of adjusting the segments of the spinal column by hand only, for the correction of the cause of dis-ease."

"Chiropractic is defined, the science of palpating and adjusting the articulations of the human spinal column only."

"A system of adjustment consisting of palpation of the spinal column to ascertain vertebral subluxations followed by the adjustment of them by hand, in order to relieve pressure upon nerves at the intervertebral foramina, so that the nerve force may flow freely from the brain to the rest of the body."

The first definition is Dr. Palmer's and is the best. It tells exactly what Chiropractic is, without limiting its scope and without saying things which are not true, as the others are inclined to do. The second one is from the U. C. A. Model Bill, which is very limiting and therefore not exactly true. The third definition is from Dorland's Dictionary. After the

****

BJ's definition & scope of practice is good; but, in my opinion, D.D.'s is better

TE, OUT OF VOLUME 14.

the spinal column being the only segmented structure of bone through which the nerve trunks pass, and the possibility of the displacement of its segments, changing the size and shape of the intervertebral foramina, it is possible for subluxations to occur there and offer interference with the transmission of Innate forces indirectly, if not directly. All dis-ease is thus traceable to impingements of nerve tissue in the spinal column. Chiropractic is a science which consists in having scientific knowledge of this cause of dis-ease and the artistic ability to adjust and correct these displacements of the segments of the spinal column, thereby removing interference with the transmission of Innate forces. Adjustment does not add any material or forces to the body but allows Innate to restore to normal what it would have had, had there been no interference. In this manner, health is restored. Chiropractic includes the study of all life, but that of the human body in particular. At the present time adjustments are almost entirely confined to the human spine and restoring health to the human body. Therefore, our studies, with the exception of the fundamentals, will be in regard to the human Innate Intelligence, chiefly; the human body and the functioning of its parts; and incoordinations of the same in order to arrive at proficiency in ascertaining and removing the cause of dis-ease.

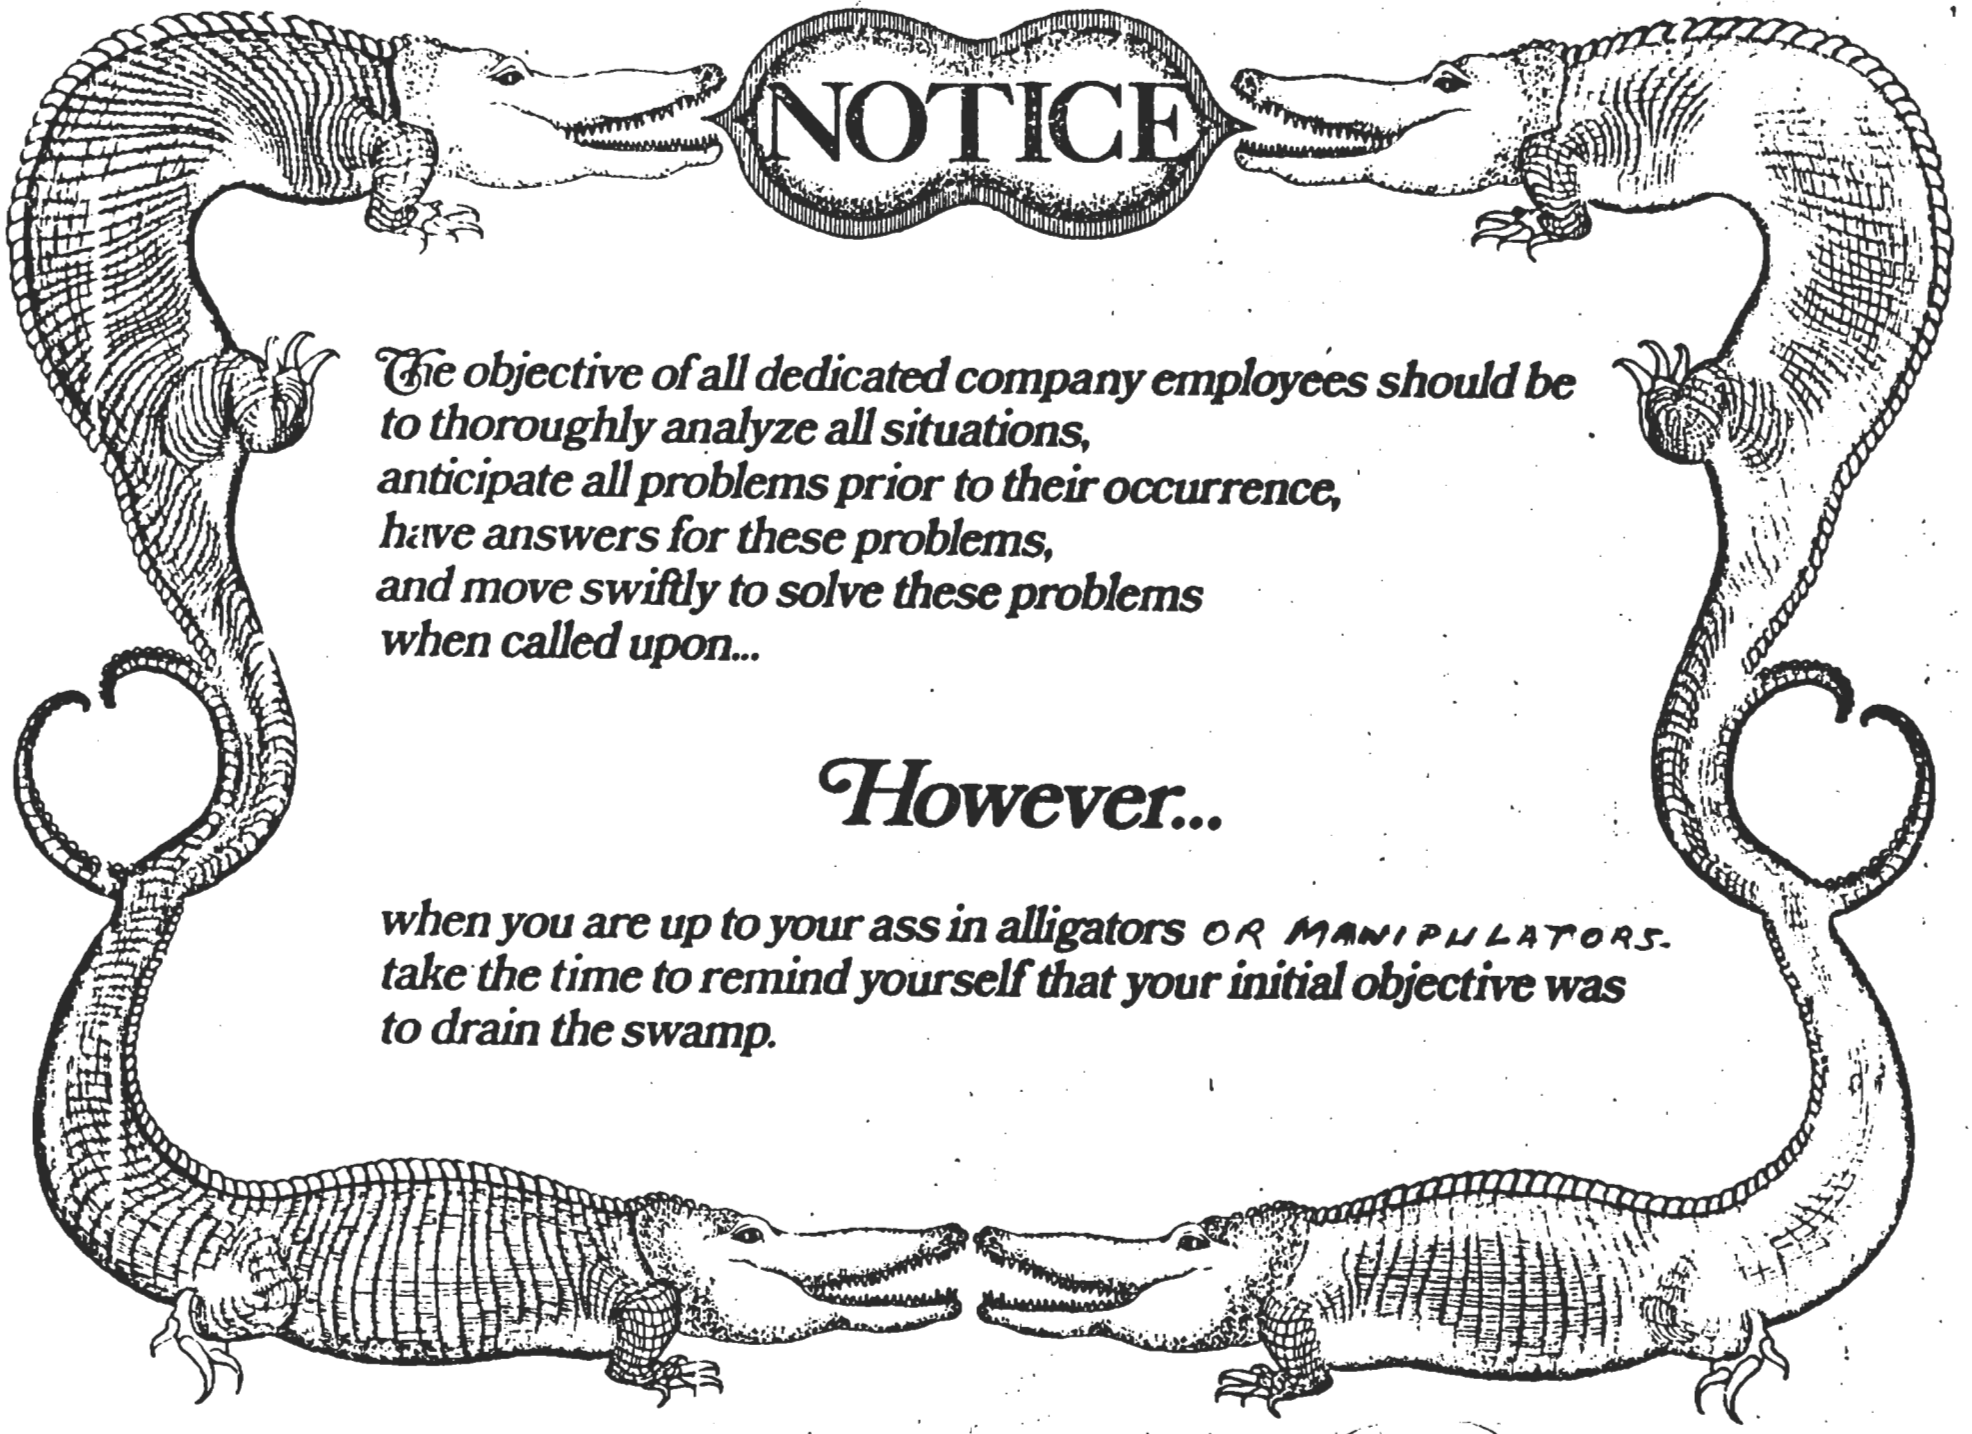
Art. 26. THE CHIROPRACTIC DEFINITION OF SUBLUXATION. (See Prin. 31.)

A subluxation is the condition of a vertebra that has lost its proper juxtaposition with the one above or the one below, or both; to an extent less than a luxation; which impinges nerves and interferes with the transmission of mental impulses.

All the factors of the foregoing definition must be given to make it complete and to make it Chiropractic. The student is advised to learn it verbatum.

Dislocations and fractures, also, can impinge nerves and interfere with the transmission of mental impulses, but fractures and dislocations are not in the realm of Chiropractic.

THE ADJUSTORS ARE LIKE D. D. & CO. B. J. PALMER. MANIPULATORS AND ALLIGATORS; LIKE LAW VIOLATORS, SWIM IN THEIR OWN SCHOOLS AND SWAMPS WHICH WERE OPENED, INHERITED, BOUGHT OR ADOPTED BY ONES LIKE THOSE WHO FOLLOW.



NOTICE
The objective of all dedicated company employees should be
to thoroughly analyze all situations,
anticipate all problems prior to their occurrence,
have answers for these problems,
and move swiftly to solve these problems
when called upon...
However...
when you are up to your ass in alligators OR MANIPULATORS.
take the time to remind yourself that your initial objective was
to drain the swamp.

COUNCIL ON DIAGNOSIS AND INTERNAL DISORDERS

OF THE AMERICAN CHIROPRACTIC ASSOCIATION

THE CHIROPRACTIC FAMILY PHYSICIAN

JULY, 1980 VOL. 2 NO. 5

RICHARD H. TYLER, D.C.

"DIVIDED WE STAND"

by

Richard H. Tyler, D.C.

I am *not* a chiropractor. I know I have the Doctor of Chiropractic degree but I don't think of myself as a chiropractor. I am a doctor — a physician — my *specialty* is chiropractic. My *first* loyalty is to the welfare of my patients *not* the name "chiropractic". Chiropractic is not synonymous with the patient's welfare. It is a viable approach to the maintenance of health but it's not a panacea. How often I've heard those monocausal madmen spouting incoherently about "universal intelligence" and "innate" curing everything. If innate is so all powerful, why does any well-adjusted person ever get ill? Yes — structural integrity is important and I love to adjust but I have enough common sense to realize that it — like any other therapeutic approach — has its limits.

Unfortunately we are irrevocably linked to the lunacy of a small but vociferous group of fanatics. Fanaticism, whether it be in a jungle clearing with a religious cult, or in the halls of congress, can spawn sickening and potentially dangerous consequences. Recently a group of "our" fanatics did their act before a congressional committee with almost disastrous results. At issue was the certifying of the CCE as the accrediting agency for the profession. By the time the "super straights" were through assuring the committee that we were stupid and inadequately trained to do anything but crack backs, it was all the CCE could do to get an extension of one year instead of the usual three. There was even talk among the committee members about the profession losing most of the benefits we may already have. Even the ICA felt the need to send a letter to its membership expressing its embarrassment and lack of support for this small band of cult chiropractors.

When pressed by the members of the congressional committee the fanatics had to finally admit that the total membership of their cult included approximately 600 "doctors" and *students*. We probably have the dubious distinction of being the only profession in the healing arts in which its quacks are organized — with *officers*. So here is the situation, a rather classic one, in which the tail is literally wagging the dog. Many thousands of well-educated chiropractic physicians being politically buffeted about because of the incoherent mumblings of a small band of driven and dangerous cultists. And there's no reasoning with them. They won't *let* the rest of us practice in peace as our consciences might dictate. They don't even want their students to be *exposed* to something they might disagree with. They want to burn the books and control the thought processes in a blatant display of contempt for the intelligence of those who attend their "schools". You must practice chiropra*ctic* in order to be a chiropra*ctor*.

Recently I read an article that had the super straights crowing triumphantly about a decision by the New Jersey supreme court in which it was stated that the CCE indeed represented the "mixer" approach as opposed to the "straight". That there were *two* professions. For once I am in total agreement. There *are two* professions.

I once wrote that we should have a separation. Now let's make it a divorce. In the settlement I wanted all the diagnostic tools and the modalities but that apparently

COUNCIL ON DIAGNOSIS AND INTERNAL DISORDERS
OF THE AMERICAN CHIROPRACTIC ASSOCIATION

This is a Composite; out, is in context. RE: 7/1980 & 3/1979

THE CHIROPRACTIC FAMILY PHYSICIAN

MARCH 1979 VOL. 1, NO. 3

George H. Haynes
B.A., M.A., D.C.

THE ONE WHO BOUGHT CALE'S COLLEGE OF NATUROPATHY'S CHARTER & ABSORBED ALL DECEASED SCHOOLS like it in CALIF ESP. THE SA CALIF Fellow OF CHIRO. PHYSICIANS

IN MEMORIAM

Dr. George H. Haynes, whose picture appeared on the cover of the March, 1979 Chiropractic Family Physician passed, away on May 5th, 1979. He had been in ill health since 1976 and found it expedient to reduce his activities as President of the Los Angeles College of Chiropractic at that time. He had been dean of the college since 1954 and guided it successfully through many lean years, providing both inspiration and energy until the growth of the college required expansion and a new classroom building to provide facilities for over 600 students. The new building was completed while Dr. Haynes was still active at the college.

Dr. Haynes also headed the effort to gain Federal recognition of the Council on Chiropractic Education as the accreditation agency of the profession. To his everlasting credit, this was achieved in August, 1974 and was a major landmark for chiropractic educational institutions.

Dr. Haynes will be missed by his host of friends and many hundreds of students who benefited from the high standards of education which he maintained while they were in college at L.A.C.C. He will also be long remembered in the profession as one who gave his full dedication for the advancement of chiropractic. Dr. Haynes was recognized in Who's Who in Chiropractic, 1976-78.

NOT THOUSANDS AS WAS THE CASE OF BJ PALMER —

Continued from page 5

wasn't good enough. What I forgot to ask was what the straights wanted in return. Now I feel I know the answer. They want the *name*. They want the name chiropractic. This is what it's all been about. So in this divorce settlement, I propose that we give them custody of the name "chiropractic". They can take it apart, play with it or molest it for all I care. You see, this may sound strange, but I care more about practicing the best kind of health care for my patients than about a set of letters. Call me what you will but I demand the right to practice with the tools I have been *taught* to use. If this means giving up a name — so be it. They don't want me or anyone else around who thinks differently than they do so let's give them what they want if in so doing it means professional survival and the right to practice as *physicians*. (BUT TYLER THAT'S ILLEGAL!)

I can already see all the worried compromisers predicting doom if we officially part. Well, I predict doom if we stay together. Unfortunately the public has the disturbing tendency to judge something by its *lowest* common denominator. If we stay with the cultists we can only degrade ourselves down to their level. Dividing *isn't* defeat, it's *honesty* and common sense. To be able to practice with honesty is a victory.

Therefore I propose that the ACA change its name and political thrust. Perhaps it could be called the American Physical Medicine Association or for the more sentimental the American Chiropractic *Physicians* Association. *Two* licenses should be granted — one to chiropractors or chiropractic technicians and the rest to drugless or chiropractic physicians. Whatever is done, the time to act is *now*. Remember, the welfare of the *ailing* not chiropractic is the supreme law and to rephrase an old saying "Together we fall — *divided* we stand."

9 SECONDS THAT MOTION

THE CHIROPRACTOR 1914

PHOTO-REPRINT BY DR. E. R. BEBOUT

1969

The Moral and Religious Duty of a Chiropractor.

The following has been sharply criticised by a few chiropractors, but not as severely, nor by as many as was my announcement of the moving of joints by hand. A part of this criticism was based upon rival jealousy, the balance because of wrong impressions. That which was on account of a lack of information discontinued as soon as the would-be critics were well informed. I have received greater applause at the close of the following lecture from my classes than from any other. Every important chiropractic idea that I have advanced has been bitterly assailed, yet, although somewhat discouraged at times, I have not turned from that which I knew was correct.

The Constitution of the United States declares that "Congress shall make no law respecting an established religion, or prohibiting the free exercise thereof." The great state of California has granted the same privilege in its medical act, by declaring in Sec. 17, "Nor shall this act be construed so as to discriminate against . . . . . the practice of religion." It was quite mindful and generous of those who framed the California Medical Act to coincide with the Constitution of the United States in not allowing the Medical Act to conflict with the Constitution of the United States nor interfere with the religious duty of chiropractors, a privilege already conferred upon them. It is our business as chiropractors to assert our religious rights. There could be no religion without science and philosophy.

Other states than California, in their laws to regulate the practice of medicine, have been mindful of religious conscience.

Kansas. "Nothing in this act shall be construed as interfering with any religious beliefs in the treatment of disease."

Virginia. "This act does not . . . interfere in any way with the practice of religion."

Washington. "This act does not apply to . . . nor interfere in anyway with the practice of religion."

Illinois. "Nothing in this act applies to . . . any person who administers to or treats the sick or suffering by mental or spiritual means without the use of any drug or material remedy."

The new law of 1913 of the state of California says, "Nor shall this act be construed so as to discriminate against . . . the practice of religion."

Chiropractic is a science and an art. The philosophy of chiropractic consists of the reasons given for the principles which compose the science and the movements which have to do with the art.

FROM 1922 UNTIL 1970, WE RECEIVED THE ENTIRE DIRECTORY FREE! THAT WAS, AND IS, THE LAW! NOW YOU MUST BUY IT! WONDER WHY C.C.A. DID THAT?

IN 1904 THERE WAS ONLY ONE SCHOOL OF CHIROPRACTIC IN THE WORLD. IN THE PSC, THERE WERE ONLY TWO TEACHERS, D.D. AND B.J. PALMER. BY 1906 D.D. MOVED TO CALIF. HAD GRADUATED ONLY 20 STUDENTS - B.J AND 12 OF THESE FORMED THE UNIVERSAL CHIROPRACTORS ASSOCIATION. IN 1906, THE P.S.C. HAD ONLY TWO TEACHERS, B.J. & MABEL, AND FOUR STUDENTS.

AS PALMER GRADUATES AND COLLEGES OPENED BY PALMER GRADUATES BEGAN PRACTICING IN DIFFERENT PARTS OF THE UNITED STATES, OTHERS* THOUGHT THEY COULD DO A BETTER JOB BECAUSE THEY DID MORE THAN JUST DO JUST SUBLUXATIONS.

SINCE THEY DID NOT HAVE STATE BOARDS OF EXAMINERS AND LICENSES, THEY PUT UP "SCHOOL OR COLLEGE OF CHIROPRACTIC" ON THEIR BUILDINGS, BUT STILL TAUGHT THE SAME THINGS!

*OTHERS? MASSEURS, NATUROPATHS, PHYSICAL (PHYSIO) THERAPY, HOMEOPATHY, OSTEOPATHY, AND OTHER PATHS!

Green: for emphasis

QUOTES

"...California - long a battleground for scope of practice test cases by advocates of both camps..." (Gibbons, 1982)

CHRONOLOGY (1845-1910)

1845 (Mar 7): **DD Palmer** is born in Port Perry, Ontario

1866 (July 13): Friday 1PM: **George Starr White** (MD, DC, PhD, ND), future dean of the **LACC** (1921-1923) is born in Danbury CT (White, 1924)

1873 (July 25): James Franklin **McGinnis**, co-founder of the **Golden State College of Chiropractic** (**GSCC**) is born in Iowa City IA

1874 (Oct 11): **Linnie Angeline Cale** born on a farm in Shelby County, Indiana (Gruber, 1983; Rehm, 1980, p. 286; ***CCA Journal***, undated); "her father, Elwood Facemire, was of German descent and her mother, Amanda, was of English" (***CCA Journal***, undated)

1876 (Apr 3): California enacts "An act to regulate the practice of medicine" (Booth, 1924, p. 121)

1881 (Apr 5): Tullius de Florence **Ratledge** (TF) is born in Hartsville, Tennessee; died in Rogers AK, July 26, 1967 (Rehm, 1980); his parents are pioneer schoolteachers (Smallie, 1980?)

1883 (May 22): **Charles H Wood** born in Greeley, CO; a PSC graduate who entered practice in 1908; "He also attended the National Schools as well as a school of homeopathy and the Still Osteopathic College" (Gruber, 1983)

1890: Richard Murrell **McLain** (1920 grad and faculty member at **LACC** in 1920; interested in and teacher of iridology beginning in 1926) is born (Jensen, 1976, p. vi)

1891 (Sept 21): Harold A Houde is born in Lea Minnesota; Houde will graduate from the LACC in 1922 and subsequently serve as instructor in pathology (probably at **SCCC**?); in 1937 "he became co-owner of the California College of Natural Healing Arts (**CCNHA**); in 1947 will become Chief of Staff of the Clinic at **LACC** (In Memoriam, 1958)

1892: **Linnie Cale** enrolls at the Indiana State Normal School, serves as treasurer of the school's YWCA in 1893-94 (Certificate #358/July 31, 1950/Rehm)

1892 (May 10): AT Still receives charter for the **American School of Osteopathy** (**ASO**) in Kirksville MO (Booth, 1924, p. 79)

1893 (March): first class graduates from Still's **ASO**; among the graduates are **AP Davis** MD (homeopathic?) and AG Hildreth (Booth, 1924, p. 81)

1893: AW **Richardson** A.B. (future president of the **California Chiropractic College**; also ?founder? of CCA? according to Jackson, 1991) graduates from Lincoln Normal University, Lincoln NE

1895: **Charles and Linnie Cale** marry after meeting at Indiana State Normal School in Terra Haute (Rehm, 1980, p. 286); **Charles A Cale** was a graduate of the Warren IN High School and the Indiana State Normal School (LACC, 1921-22, 1922-23)

1896 (May): Pacific School of Osteopathy (**PSO**) was established at Anaheim CA; 20 month course from the outset (Booth, 1924, p. 87)

1896 (July 14): **PSO** is charterd/incorporated (Booth, 1924, p. 87)

c1895-1900: **Charles A Cale** teaches in public schools in Indiana (LACC, 1921-22, 1922-23)

1896 (Jan): Harvey Lillard first learns of chiropractic from **DD Palmer** in Davenport, Iowa (Palmer, 1897)

the purging upward; upon the stoppage of it death.

81. In the discharges by the bladder, the belly, and the flesh (*the skin?*) if the body has departed slightly from its natural condition, the disease is slight; if much, it is great; if very much, it is mortal.

82. Persons above forty years of age who are affected with frenzy, do not readily recover; the danger is less when the disease is cognate to the constitution and age.

83. In whatever diseases the eyes weep voluntarily, it is a good symptom, but when involuntarily, it is a bad.

84. When in quartan fevers blood flows from the nostrils it is a bad symptom.

85. Sweats are dangerous when they do not occur on critical days, when they are strong, and quickly forced out of the forehead, either in the form of drops or in streams, and if excessively cold and copious; for such a sweat must proceed from violence, excess of pain, and prolonged squeezing (*affliction?*).

86. In a chronic disease an excessive flux from the bowels is bad.

87. Those diseases which medicines do not cure, iron (*the knife?*) cures; those which iron cannot cure, fire cures; and those which fire cannot cure, are to be reckoned wholly incurable.

The Law

MEDICINE is of all the Arts the most noble; but, owing to the ignorance of those who practice it, and of those who, inconsiderately, form a judgment of them, it is at present far behind all the other arts. Their mistake appears to me to arise principally from this, that in the cities there is no punishment connected with the practice of medicine (and with it alone) except disgrace, and that does not hurt those who are familiar with it. Such persons are like the figures which are introduced in tragedies, for as they have the shape, and dress, and personal appearance of an actor, but are not actors, so also physicians are many in title but very few in reality.

2. Whoever is to acquire a competent knowledge of medicine, ought to be possessed of the following advantages: a natural disposition; instruction; a favorable position for the study; early tuition; love of labor; leisure. First of all, a natural talent is required; for, when Nature opposes, everything else is in vain; but when Nature leads the way to what is most excellent, instruction in the art takes place, which the student must try to appropriate to himself by reflection, becoming an early pupil in a place well adapted for instruction. He must also bring to the task a love of labor and perseverance, so that the instruction taking root may bring forth proper and abundant fruits.

3. Instruction in medicine is like the culture of the productions of the earth. For our natural disposition is, as it were, the soil; the tenets of our teacher are, as it were, the seed; instruction in youth is like the planting of the seed in the ground at the proper season; the place where the instruction is communicated is like the food imparted to vegetables by the atmosphere; diligent study is like the cultivation of the fields; and it is time which imparts strength to all things and brings them to maturity.

4. Having brought all these requisites to the study of medicine, and having acquired a true knowledge of it, we shall thus, in traveling through the cities, be esteemed physicians not only in name but in reality. But inexperience is a bad treasure, and a bad fund to those who possess it, whether in opinion or reality, being devoid of self-reliance and contentedness, and the nurse both of timidity and audacity. For timidity betrays a want of powers, and audacity a want of skill. There are, indeed, two things, knowledge and opinion, of which the one makes its possessor really to know, the other to be ignorant.

5. Those things which are sacred, are to be imparted only to sacred persons; and it is not lawful to import them to the profane until they have been initiated in the mysteries of the science.

THIS IS A COPY OF PAGE 2 OUT OF THE GREAT BOOKS OF THE WESTERN WORLD, VOL. 10.

ons in good health, and they generally have ard and unconcocted tubercles in the lungs, or the gibbosity and the distension are pro- uced mostly by such tubercles, with which the eighboring nerves communicate. When the ibbosity is below the diaphragm, in some hese cases nephritic diseases and affections of hebladder supervene, but abscesses of a chronic ature, and difficult to cure, occur in the loins nd groins, and neither of these carries off the ibbosity; and in these cases the hips are more maciated than when the gibbosity is seated igher up; but the whole spine is more elon- ated in them than in those who have the gib- osity seated higher up, the hair of the pubes nd chin is of slower growth and less developed, nd they are less capable of generation than hose who have the gibbosity higher up. When he gibbosity seizes persons who have already ttained their full growth, it usually occasions crisis of the then existing disease, but in the ourse of time some of them attack, as in the ase of younger persons, to a greater or less de- ree; but, for the most part, all these diseases re less malignant. And yet many have borne he affection well, and have enjoyed good health ntil old age, more especially those persons whose body is inclined to be plump and fat; nd a few of them have lived to beyond sixty ears of age, but the most of them are more hort-lived. In some cases the curvature of the pine is lateral, that is to say, either to the one ide or the other; the most of such cases are con- nected with tubercles (*abscesses?*) within the pine; and in some, the positions in which they ave been accustomed to lie co-operate with the disease. But these will be treated of among the hronic affections of the lungs; for these the most uitable prognostics of what will happen in these ases are given.

42. When the spine protrudes backward, in consequence of a fall, it seldom happens that one succeeds in straightening it. Wherefore suc- cussion on a ladder has never straightened any body, as far as I know, but it is principally prac- ticed by those physicians who seek to astonish the mob—for to such persons these things ap- pear wonderful, for example, if they see a man suspended or thrown down, or the like; and they always extol such practices, and never give themselves any concern whatever may result from the experiment, whether bad or good. But the physicians who follow such practices, as far as I have known them, are all stupid. The de- vice, however, is an old one, and I give great praise to him who first invented this, and any other mechanical contrivance which is accord- ing to nature. For neither would I despair, but that if succussion were properly gone about, the spine, in certain cases, might be thereby recti- fied. But, indeed, for my own part, I have been ashamed to treat all such cases in this way, be- cause such modes of procedure are generally practiced by charlatans.

43. Those cases in which the gibbosity is near the neck, are less likely to be benefited by these succussions with the head downward, for the weight of the head, and tops of the shoulders, when allowed to hang down, is but small; and such cases are more likely to be made straight by succussion applied with the feet hanging down, since the inclination downward is greater in this way. When the hump is lower down, it is more likely in this case that succussion with the head downward should do good. If one, then, should think of trying succussion, it may be applied in the following manner:—The lad- der is to be padded with leather lined cushions, laid across, and well secured to one another, to a somewhat greater extent, both in length and breadth, than the space which the man's body will occupy; he is then to be laid on the ladder upon his back, and the feet, at the ankles, are to be fastened, at no great distance from one an- other, to the ladder, with some firm but soft band; and he is further to be secured, in like manner, both above and below the knee, and al- so at the nates; and at the groins and chest loose shawls are to be put round in such a fashion as not to interfere with the effect of the succussion; and his arms are to be fastened along his sides to his own body, and not to the ladder. When you have arranged these matters thus, you must hoist up the ladder, either to a high tower or to the gable-end of a house; but the place where you make the succussion should be firm, and those who perform the extension should be well instructed, so that they may let go their hold equally to the same extent, and suddenly, and that the ladder may neither tumble to the ground on either side, nor they themselves fall forward. But, if the ladder be let go from a tower, or the mast of a ship, fastened into the ground with its cordage, it will be better, so that the ropes run upon a pulley or axle-tree. But it is dis- agreeable even to enlarge upon these matters; and yet, by the contrivances now described, the proper succussion may be made.

44. But if the hump be situated very high up, and if succussion be by all means to be used, it will be better to do it with the feet downward, as has been said, for the force downward will
